FOR IMMEDIATE RELEASE

eBiz Software Opens Leawood Office

**Leading Kansas City Area Businesses to Predictable Profitability
while maintaining Brand Integrity**

Topeka, Kansas – April 26, 2006 – eBiz software recently held an Open House celebration with friends, customers and the Greater Kansas City Chamber Champions who provided the official ribbon cutting ceremony.

eBiz Software workflow automation solutions saves one Kansas City customer \$650,000 annually through software developed to reduce inventory, carrying charges, inventory management expenses, forms obsolescence and forms management costs. In addition, maintenance of product information is controlled by the business ensuring uniform brand identity on products. This software solution manages 3000 line items per month purchased from six suppliers and used in 365 office locations tracking \$1,000,000 in online spending.

“Our workflow solutions philosophy is rooted in real world experience. With over six decades of collective experience in developing innovative and effective business solutions, we’ve grown up as corporate problem-solvers,” said Geri Dyche, President of eBiz Software, Inc. “We not only know what it’s like to run the operations side of businesses; we have been in the trenches helping architect, design, develop and test workflow solutions.”

About eBiz Software
